Chairman's message

Dr. Hamza Al Kholi

Chairman

A legacy built over half a century, the Al Kholi Group has built its reputation in the Kingdom through means of sustainability, quality work delivered on time, and having experts on our team who diligently support each project. From the very beginning, our core focus has been on convenience of our Customers. Throughout the years, our hard work and commitment have resulted in the Al Kholi Group serving as gateway between Saudi Arabia and our international Partners that has allowed us to continue working towards our long term goals through innovation, clear direction, and meticulous organisation.

Branching out and setting up subsidiaries that cater to various sectors of Technologies and Healthcare, Construction, Facilities Maintenance, Management Consulting, Energy Retrofit, Elevators and Escalators, and MEP Contracting as well as Pre-Fabrication, we have dedicated ourselves to enhancing the quality of life of our community.

Our core success factors are our distinguished management, our diversified portfolio of services, products, Partners and Clients as well as our dedication to the goal of creating a sustainable environment for our employees and customers. We are working towards a comprehensive approach to sustainability and the environmental safety that will set the precedence for the future. We lay the foundations today and begin the ground work for a better, healthier, and safer today, tomorrow, and the years to come.

Established by a consolidated team of specialized dedicated engineers and a committed management with a combined experience of over and above 50 years in MEP Field, in various aspects of engineering, procurement, construction, operation and maintenance. Our experienced team has delivered very prestigious projects both in the Kingdom as well as the wider Gulf area. Some of these projects have become major landmarks. Therefore, we extend our commitment in making our client's views into truth maintaining the most excellent details through the process.

As the Al Kholi Group expands and grows its operations and services, we strive to become not only leaders within the region, but also globally and be at the helm of crafting a sustainable future through means of innovation, dedication, and an unwavering commitment to establishing a progressive tomorrow, as well as being part of the successful Saudi Arabia Vision 2030.

About the GM

Ayman Abd Elgabbar

General Manager MEP

With over 27 years of experience in the Middle East under his belt, Ayman is heading the MEP vertical at Al Khali Group for UP and AKTEK. Working within various multinational companies in complex engineering environments at various levels of responsibility progressive elevation from field duties to senior management and directorial responsibilities.

His vast experience in projects engineering and Operations Management for several Complex Commercial, Rail, Airports and Hospitals projects mega projects with major international firms has gained him extensive knowledge of the urban transport sector, such as that for Dubai Metro project as General Manager. MEP works in Obayashi Middle East, Drake and Scull as the MEP major contractor as Regional Director for developing Rail business.

- Installation Of Services
- Testing, Commissioning & Handing Over

EXECUTION:

- Material approval and deliveries will be planned as per projects needs.
- Installation teams will be assigned as per master plan.
- Quality standard will be maintained as per client's expectations.

MEP SERVICES

Mechanical, Electrical and Plumbing needs are key requirements for the energy efficiency of modern commercial construction. Since buildings are a major consumer of energy, MEP companies can make a huge difference to meet the efficiency expectations of lean construction. The Mechanical, Electrical and Plumbing (MEP) work is part of the implementation of high-rise construction work that often has problems in its completion due to factors or variables that influence each other.

Therefore, it is necessary to apply a method as an alternative to solving existing problems. The application can reduce waste material in construction work including the work of MEP, which is able to minimize activities that do not produce value on the results of construction work and reduce the residual material used.

Hence, the main role of an MEP company is to ensure that all the mechanical, electrical and plumbing systems are integrated seamlessly and efficiently into construction from the beginning.

UP operates through an integration of a vertical and horizontal matrix which aims to ensure an ultimate responsiveness vis-a-vis client's requirement with respect to operations and maintenance.

The main objective of UP is to achieve an idealistic harmony amongst modern applicable technology, manpower and resulted costs.

Activities Accomplished By The Company:

The company provides various services in many fields, for example, and not limited to:

Power Generation Devices:

Installation, preliminary testing, operate, maintain, and control switchgear, generators, UPS, Control panels, facilities assistance and Control Systems.

Air Conditioning & Refrigeration Systems:

Installation, a preliminary testing to receive and the operate and maintain air conditioning systems of various kinds (Window – Split model – central air conditioning systems) as well as refrigerants. All kind of works in this field include maintenance of refrigerators, cooling of all sizes and types and the machine of ice-making and freezer units.

Telecom Systems And Devices:

Installation and maintenance of telecom equipment and systems with high efficiency.

Installation of Closed TV Circles:

Installation, operation and maintenance of closed TV Circles for all purposes.

Water Treatment Units:

A preliminary test to receive, operate, maintain and monitor water treatment units, such as units of reverse osmosis water treatment and water purifiers

Units Sewage Treatment:

Operation and maintenance of sewage treatment units large and small and with a normal level or advanced level of technology.

Sports Facilities:

Maintenance and operation of all kinds of sports facilities such as swimming pools, sports stadiums domestic and internal and cinema, theater, meeting rooms etc.
